

TH 1 Classic & Special

The Classic of Thin Stone Technology

TH 1 is the classic laying panel in hybrid technology. Expanded gas concrete combined with 5 mm of natural stone results in a light and very robust final product. TH 1 Special is the continued development of TH 1 for even higher durability and an additional glass fibre layer.

Layers:

5 mm natural stone
Fibreglass
12 mm or 18 mm lightweight concrete
Special: fibreglass

Thickness:

14, 18 or 26 mm total thickness

Weight:

20,5 kg/m² - 26,5 kg/m²

Sizes:

Maximum 240 x 125 cm or 260 x 125 cm

Safety/Certificate:

- Fire class B1 ⁽¹⁾
- Frost resistance ⁽²⁾
- Shearing/bending: average breaking moment at 0,98 kNm/m

Fields of Use:

- Interior
- Exterior
- Floor covering
- Wall cladding
- Ceiling cladding
- As décor
- As prefabricated dimensioned piece
- Special shape

Application:

- Gluing on wood, metal, concrete and plaster
- Screwing to frame support
- Fastening according to technical requirements

Notes:

Full-surface or spot application, depending on the place of use

⁽¹⁾ Acc. To a test report of TH Braunschweig

⁽²⁾ Acc. To a test report of TU Berlin
