TH 4 Aluminium Honeycomb

Ultralight

TH 4 aluminium honeycomb was, similar to TH 4 Alucobond, developed for interior use. The honeycomb-like quality of the carrier material gives the stone bonded to it enormous strength. TH 4 aluminium honeycomb is very well suited for high point loads.

Layers:	**Thickness:**
5 mm natural stone Fibreglass 5 mm – 25 mm aluminium honeycomb	10 mm - 30 mm total thickness
Weight:	**Sizes:**
20 – 25 kg/m^2	Maximum 250 x 125 cm
Safety/Certificate:	**Fields of Use:**
Fire class B2 [(1)]	• Interior • especially for heavy weight demands • high impact resistance
Application:	**Notes:**
• bonding to wood, metal, concrete and plaster • screwing onto frame carrier • riveting to agraffes	Full-surface or spot application, depending on the place of use

[(1)] Acc. To a test report of TH Braunschweig
[(2)] Acc. To a test report of TU Berlin
