TH Ceramic

No Chance for Moisture

TH Ceramic is made of 5 mm natural stone and a very light and patented carrier. The carrier material is insensitive to constant and direct water and moisture contact. This is why this lightweight panel is ideal for applications in wet rooms, for example in swimming pools, steam saunas, etc.

Layers:	**Thickness:**
5 mm ceramic Fibreglass 5 mm natural stone	10 mm total thickness
Weight:	**Sizes:**
19,2 – 22,5 kg/m^2	Maximum 250 x 125 cm
Safety/Certificate:	**Fields of Use:**
• Frost resistance [2] • Warp free • Compressive strength and bending behaviour according to test report • No water absorption • Fire class B1 according to DIN 4102-1 [1]	• Interior • Exterior • Wall cladding • Indoor and outdoor swimming pool construction
Application:	**Notes:**
• Gluing to wood, metal, concrete and plaster • Screwing to frame carrier • Fastening according to technical requirements	No breeding ground for mould or fungi, resistant to insect or pest infestation
