

TH Illuminated Honeycomb

Extremely Light and Water-Resistant

TH Illuminated Honeycomb, like TH 4 Aluminium Honeycomb, and TH 4 Alucobond, was developed for interior use. The honeycomb-like character of its carrier material gives an enormous strength to the on-glued stone, has high impact resistance and is very well suited for high point loads.

As the name already suggests, this panel is also used as a backlight for water walls and is ideal for showers and wet rooms. As a luminous ceiling, amazing accents can be set in interior design.

Layers:

5 mm natural stone
10 mm – 25 mm Illuminated Honeycomb

Thickness:

10 mm - 30 mm total thickness

Weight:

20 kg/m² – 25 kg/m²

Sizes:

Maximum 250 x 125 cm

Safety/Certificate:

Fire class B2 ⁽¹⁾

Fields of Use:

- Interior
- Damp and wet rooms, for example for illuminated water walls, shower walls and ceiling coverings
- Especially for heavy weight loads
- High impact resistance

Application:

- Gluing to wood, metal, concrete and plaster
- Screwing onto a frame carrier
- Fixing to agraffes

Notes:

Full-surface or spot application, depending on the place of use

⁽¹⁾ Acc. To a test report of TH Braunschweig

⁽²⁾ Acc. To a test report of TU Berlin
