TH Natural Stone Foil

Only 2 mm Total Thickness

Natural Stone wafer-thin: instead of with wood trim, interiors and three-dimensional objects can be clad with these extremely thin stone surfaces. Especially in weight-sensitive areas, such as airplanes, ships or cars.

Layers:	**Thickness:**
2 mm natural stone	2 mm total thickness

Weight:	**Sizes:**
26,5 kg/m^2	Maximum 260 x 125 cm

Safety/Certificate:	**Fields of Use:**
• Frost resistance • Compressive strength and bending behaviour according to test report • Fire class B1	• Interior • Exterior • Moulded parts of all kinds

Application:	**Notes:**
• As ventilated façade • Fixing of the agraffes by cast-in threads	For almost all commercially available aluminium substructures

(1) Acc. To a test report of TH Braunschweig
(2) Acc. To a test report of TU Berlin
